Summary

A tech-savvy individual with expertise in Core Java, Kotlin, MySQL, HTML, CSS and more. Experienced in developing mobile and web applications. Aiming to leverage skills in mobile application development to contribute effectively to innovative projects.

Education

Parikrama Group of Institutions, Shrigonda   2024 – 2026
Master in Computer Applications

New Arts, Commerce and Science College, Ahmednagar   2020 – 2023
Bachelors in Computer Applications (Commerce)

Projects

Online Shopping Management System   January 2023
- Developed a web-based shopping platform using **Java** and deployed it on an **Apache Tomcat server**.
- Implemented user functionalities including product browsing, cart management, order placement, and payments.
- Designed responsive web pages for both customers and administrators using **HTML, CSS,** and **JSP.**

Netflix Clone App   April 2025
- Developed a feature-rich Movie App using **Android** with **Java** and **Kotlin**.
- Integrated real-time movie data from a public **API** for browsing, searching, and detailed views.
- Ensured smooth navigation and UX with ViewModel, LiveData, and Navigation components.

Predator Clock   June 2025
- Designed and developed a real-time digital clock **widget** and *Predator Clock* using **Kotlin** for Android.
- Implemented an interactive clock display using custom ImageViews for each digit, dynamically updating every second.
- Built features such as color customization in **color picker**, and **persistent time rendering** even during system idle.
- Integrated **AlarmManager** and **Service** to ensure consistent background widget updates, enhancing reliability and user experience.
